https://awaastech.com/#features

Live View

Living spaces,
+ beautifully managed.

Research brings you one-to-one housing societies with secure communities, transparent financials, and effective resident satisfaction.

Get the App

Core Platform Features

Everything you need to manage your society, all in one place.

Secure Payment

Secure transactions and payments, ensuring complete transparency and security.

Financial Ledger

Real-time ledger with AI-powered auditing and secure transaction management.

Secure Ecosystem

Secure ecosystem connecting residents, vendors, and service providers in a safe environment.

How it works

Three simple steps to get your society.

Set Up Your Society

The admin registers the society, sets up the financial structure, and generates a secure society code.

Onboard Residents

Residents download the app, enter the society code, and are instantly connected to the digital ecosystem.

Manage Everything

Admins manage financials, track bills, and track society app activity from one central dashboard.

We build communities,
not just software.

Our mission is to revolutionize the future of digital living. By providing a transparent, beautifully designed platform, we empower society committees to govern efficiently, solving long-standing issues of trust.

Built with Care

For Everyone

Real-time transparency.

Every transaction is transparent, every bill is visible, and every update is pushed in real-time. No more sharing the accounts.

Platform Security

At Awaastech, the security of your data and the digital safety of your community are our top priorities. We employ enterprise-grade security protocols with End-to-End Encryption, Role-Based Access Control, and Continuous Monitoring.

Next: Society Analytics Finale 🙌

End-to-End Analytical Depth

Society Analytics: Financial & Operational Telemetry

Comprehensive analytics tracking collection velocity, occupancy ratios, expense breakdowns, and predictive cash flow.

Production Ready & Open Source ★

Built for Modern Communities.

Production-Grade Engineering.

From automated maintenance billing to AI dispute reconciliation and ALPR security — Awaastech redefines society management.

Idempotent Billing & Webhooks

Redis Lua distributed locks eliminate double-charges across concurrent servers.

LangGraph Dispute Agents

Autonomous LLM triaging resolves billing disputes and categorizes maintenance tickets.

GPS Geofenced Escrow

turf.js polygon boundaries enforce contractor presence before vendor milestone funds release.

Bank-Grade RBAC & httpOnly

Strict role isolation across 35+ endpoints with stateless Redis token blacklisting.
