

Inside The Next-Gen *Housing Society ERP.*

A live architectural walkthrough inside **Awaastech** — uniting Admins, Residents, Gate Security, and Accountants in one harmonic operating system.

The Admin *Command Center*

Comprehensive real-time telemetry: tracking active notices, pending incident tickets, active resident registry, and society dues outflow.

Resident *Complaint Management*

Categorized ticketing for electrical, plumbing, and noise issues with real-time status transitions:
Open → In Progress → Resolved.

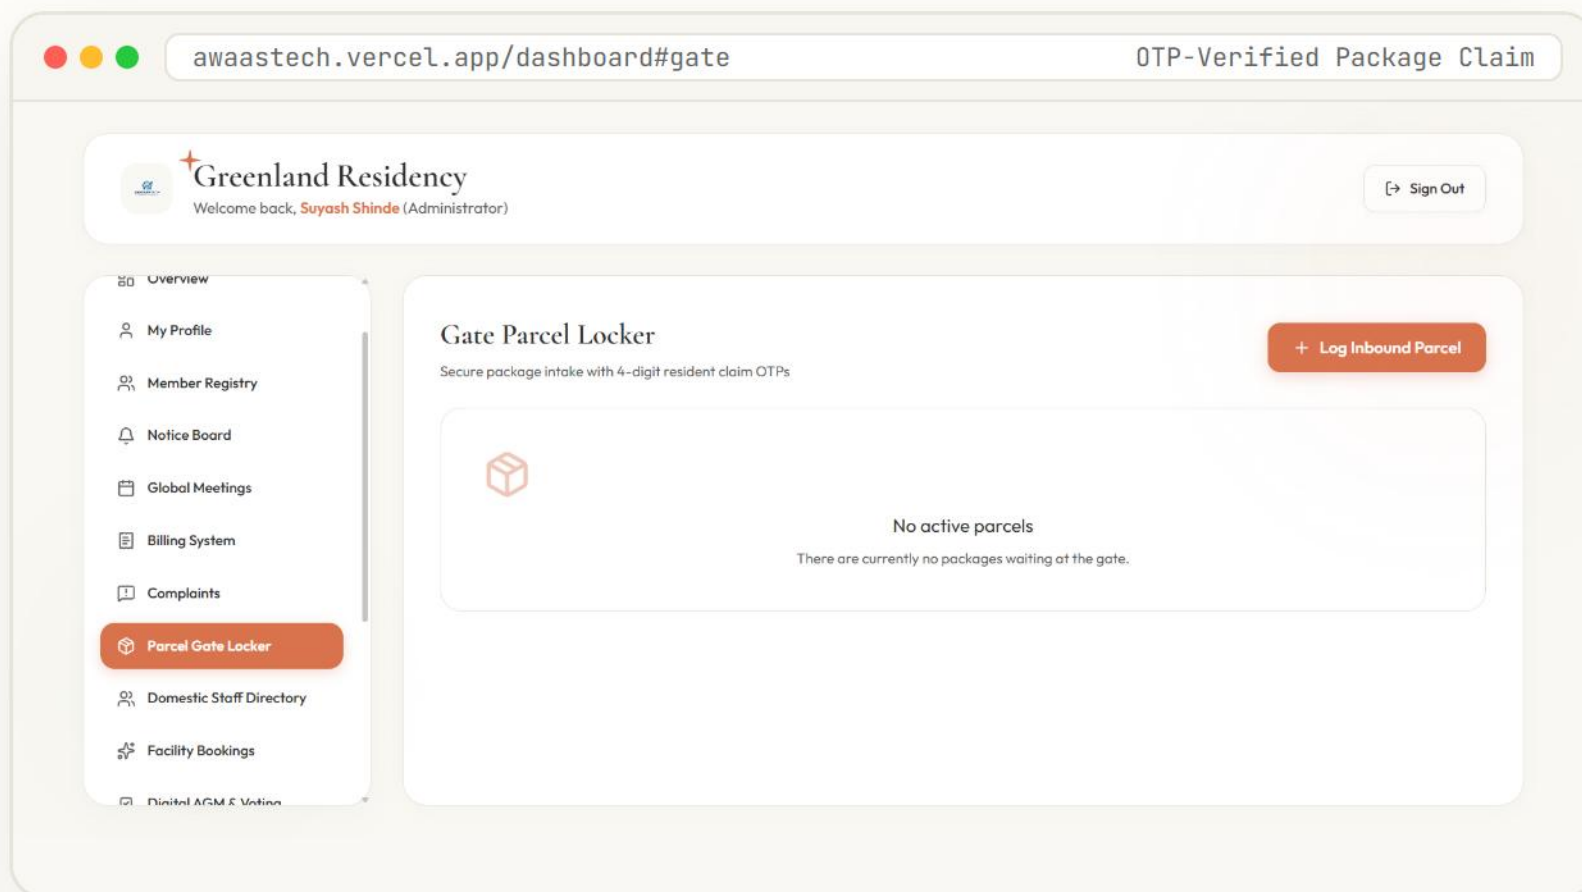

The screenshot displays the 'Greenland Residency' dashboard. The top navigation bar includes the URL 'awaastech.vercel.app/dashboard#complaints' and the text 'Active Ticket Queue'. The main header shows the user is logged in as 'Suyash Shinde (Administrator)' with a 'Sign Out' button. A left sidebar lists various system modules, with 'Complaints' highlighted in orange. The main content area is titled 'Incident Logs' and features a 'STATUS: ALL' filter dropdown. Below this, a message states 'No incidents reported' with a subtext: 'No complaints or grievances have been filed. The community is running smoothly!'. A red circle with an exclamation mark icon is centered above this message.

AI Severity Triaging Ready

Smart *Parcel Gate Locker*

Security guards log deliveries at the entrance; residents receive instant claim PIN notifications to prevent package theft.

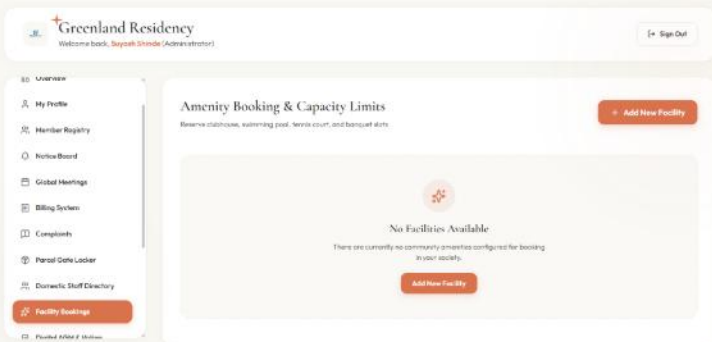

Guard Intercom Integrated 

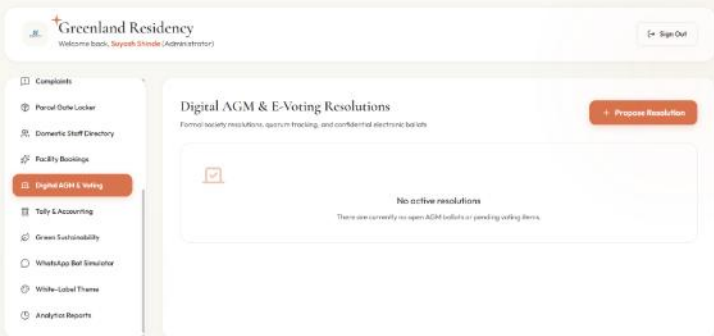

Amenity Booking & Digital Voting

Reserve clubhouses & sports courts with concurrency protection, and cast tamper-evident votes on community AGM resolutions.
